ABOUT

Born & raised in Saltillo, Mexico. Have a Computer Science bachelor's degree by National Technological Institute of Mexico, and a master's in business administration by TecMilenio University.

Along my 7 years of experience in technology I have had the opportunity to work in 3 different countries for some of the biggest consulting firms worldwide, impacting some of the most important companies around the globe on industries such as travel & communications, energy and health & insurance. I have had the opportunity to work face to face with my clients to add them value during the entire software development life cycle. I have had the grace of training and growing teams.

Twice certified as Appian practitioner. Certified in Project Management Methodologies. Focus on the use of effective code standards on all my endeavors. Have experience with Sail, C# and several technologies of Microsoft platform such as VB, VBA, ASP.NET, T-SQL, WCF, WPF & Azure as well as MVC and other distributed architectures for software development. Worked with Agile and Waterfall methodologies.

EXPERIENCE

SENIOR MANAGER / BPM DELIVERY LEAD
EY • SANTANDER (MEXICO) • FEB 2022 – CURRENT

Delivering BPM solutions for banking and financial clients in North America

APPIAN TECHNICAL LEAD
CECOACHING • SANTANDER (MEXICO) • OCT 2020 – JAN 2022

Development & growth of the Business Process Management Center of Excellence (BPM CoE). Development of different BPM applications for the Risks department of the bank. These endeavors include solutions for Enterprise Clients Management, Portfolio Management, Bankruptcy, Governments & Institutes Management and Loan Origination for SME's as well as many integrations with banking core system

SOFTWARE ENGINEER
HEXAWARE • SITA (UK) • JUL 2019 – OCT 2020

Development of a product for electronic visa for a UK client that includes the automation in Appian of all the business processes required to issue a visa such as immigration, security and document check. The application allows a user to start a visa application from an integrated frontend in Drupal and provide all required evidences based on the requested visa type, later a group of security officers and visa officers continue the process in Appian till the electronic visa is finally issued.

SOFTWARE ENGINEER
HEXAWARE • BPM LAB (INDIA) • JAN 2019 – JUN 2019

Working for Hexaware´s BPM Lab designing innovative solutions such as an application for loan origination that includes all the steps from taking a loan application up to approve it and notify both borrowers and lenders through internal feeds. The application allows borrowers to take an application form, and then it is processed, evaluated and pre-approved or denied by the bank based on the inputs from the borrower.
